Cristopher Areche Guillen

Software Engineer | React • React Native • Full Stack

Current residence: Dominican Republic | +1 347-395-4016 | cristopherarecheguillen04@gmail.com
Open to remote work | Relocation: New York or Boston | U.S. citizen | No sponsorship required
LinkedIn | GitHub | Portfolio

Software Engineer with 4+ years building web, mobile, and backend features across banking and healthcare. Combines React/TypeScript and React Native design systems with Node.js, C#/.NET, and SQL. Contributes to Qik's shared UI foundation for a banking app serving 1M+ customers.

PROFESSIONAL EXPERIENCE

Qik Banco Digital

Senior Frontend Developer | Remote, Dominican Republic — Sep 2025 – Present

- Co-develop Qik's React Native design system of 40+ components, providing a shared UI foundation used across the banking app's screens.
- Document shared components in Storybook to align design reviews and UI implementation across iOS and Android.
- Optimize image formats and payloads to improve load performance across the iOS and Android banking app.
- Develop and refactor UI components with Cursor and AI models, reviewing generated code against established component-library patterns.

Sistemas Integrados de Informatica, SRL (SII)

Senior Full Stack Developer | Remote, Dominican Republic — Nov 2023 – Aug 2025

- Delivered customer-facing banking workflows and backend integrations for 4 institutions using C#/.NET, ASP.NET MVC/Web API, TypeScript, and SQL Server.
- Modernized legacy AngularJS banking modules by migrating to Flutter/Dart and applying lazy loading and caching to improve load performance.
- Implemented client/server validation and SQL Server stored procedures for banking forms, collaborating with product and QA on acceptance criteria and pull request reviews.

Makisan Tech

Full Stack Developer | Remote, Argentina — Feb 2023 – Sep 2023

- Architected a React/TypeScript healthcare frontend with Redux Toolkit, reusable components, and design tokens to keep complex screens consistent as the UI grew.
- Built Node.js/Express APIs backed by PostgreSQL on Amazon RDS, using Sequelize, validation, pagination, and error handling to connect clinical data with the frontend.

Freelance

Frontend / Full Stack Developer | Remote, United States — Nov 2021 – Dec 2022

- Replaced manual request intake with Next.js/React client portals featuring guided forms, downloadable PDFs, and responsive, accessible interfaces.
- Connected client submissions to authenticated dashboards with Supabase Auth and PostgreSQL, enabling clients to track requests and manage their information.
- Deployed client features on Vercel with input validation, reCAPTCHA, and error logging to diagnose failed submissions and improve request reliability.

TECHNICAL SKILLS

Frontend and mobile: React, React Native, TypeScript, JavaScript, Next.js, Redux Toolkit, HTML, CSS, Tailwind CSS

UI engineering: Design systems, Storybook, Figma, accessibility, responsive design, performance optimization

Backend and data: C#, .NET, ASP.NET MVC/Web API, Node.js, Express, REST APIs, SQL Server, PostgreSQL, Supabase

Cloud and delivery: AWS, Amazon RDS, Vercel, Git, GitLab CI/CD, React Testing Library, Cursor

EDUCATION

B.S., Computer Science & Information Security | John Jay College of Criminal Justice | May 2022
A.S., Computer Information Systems | Borough of Manhattan Community College | Jun 2020
Languages: English — Native | Spanish — Native
